

Tidewater Aquatic Center

OAKLAND, CALIFORNIA

^ Macon Blade

DESCRIPTION

Located at the Martin Luther King, Jr. Regional Shoreline, the Tidewater Aquatic Center will serve local youth with rowing, canoeing, kayaking, and interpretive programs. The proposed 13,000 sq. ft. project consists of two boathouses and an accessory structure.

Designed to be energy and resource efficient, the facilities will include boat storage, launch storage, repair areas, gym facilities, meeting rooms, restrooms and dressing rooms, and staging areas as well as a security residence. The roof forms were inspired by the shape of an oar blade, and the project is intended to be a landmark from water and shore.

The project is a partnership between the Oakland Strokes and the East Bay Regional Park District.

SIZE

12,300 sf

ESTIMATED COST

\$4 million
